

AI & ML Internship Project

Project Title

AI-Powered Educational Chatbot

Project Objective

Develop an AI-powered chatbot that can answer user questions based on the content provided in a CSV file. The chatbot should provide accurate responses from the uploaded knowledge base and display a clean, user-friendly interface.

The chatbot should be designed in a way that it can be integrated into web applications in the future.

Project Requirements

Core Features

1. Question Answering System

- Read data from a CSV file.
- Answer questions based on the provided content.
- Support educational and general knowledge content.
- If the answer is not available in the dataset, return a proper fallback message such as:
 - "Sorry, I do not have information related to this question."

2. Modern Chat Interface

- Clean and attractive UI.
- Mobile-friendly design.
- Chat history support.
- User and bot message bubbles.
- Loading/typing indicator.

3. Suggested Questions

Display a few important suggested questions below the chat window.

Example:

- What is Artificial Intelligence?
- What is Machine Learning?
- Explain Data Science.
- What is Python?

Suggested questions should be clickable.

4. Search Accuracy

- Retrieve the most relevant answer from the dataset.
 - Avoid generating incorrect or unrelated responses.
 - Return a fallback response when no relevant information is found.
-

Recommended Technology

Interns may use any of the following technologies:

- Python
 - FastAPI / Flask / Streamlit
 - Pandas
 - Sentence Transformers
 - SQLite (Optional)
-

Deliverables

Interns must submit:

- Complete Source Code
 - Project Documentation
 - Demo Video
 - Working Application
-

Evaluation Criteria

- UI & User Experience
 - Accuracy of Responses
 - Code Quality
 - Project Documentation
 - Overall Functionality
-

Expected Outcome

A functional AI chatbot capable of answering questions from a CSV-based knowledge base with a clean interface, suggested questions, and accurate response retrieval.

Project Duration :- 25 Days
